PROFESSIONAL SUMMARY

Seventh-semester B.Tech Computer Science (Data Science) student seeking a data science internship. Comfortable with Python-based data analysis, exploratory data analysis and machine learning fundamentals, with a strong interest in research and development.

PROJECTS

House Price Prediction | ***Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn***

- Performed end-to-end analysis on the California housing dataset, covering data cleaning, exploratory data analysis (EDA) and feature engineering.
- Selected and compared multiple machine learning models, then evaluated prediction accuracy on held-out data.

Customer Churn Prediction | ***Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn***

- Built a classification model to predict whether credit card customers would exit or stay with the service.
- Trained and compared 4–5 models; Random Forest delivered the best performance.
- Evaluated results using F1/F2 score and confusion matrix, accounting for class imbalance.

Farmer-to-Customer Marketplace

- 6th Semester · Group Mini Project
- Group mini project building a platform that connects farmers directly with customers, removing the middlemen from the supply chain.
- Designed to improve farmer income and margins while giving customers access to fresh produce at fairer prices.

EDUCATION

APJ Abdul Kalam Technological University — **Sep 2023 – Apr 2027**
B.Tech in ***Computer Science and Engineering (Data Science)*** — *Mavelikara*

- Currently in the 7th semester; CGPA 6.57.

Sree Narayana Central School — **Jun 2021 – Aug 2023**
12th Standard in ***Biology & Mathematics*** — *Mavelikara*

- Main subjects: Biology and Mathematics; scored 63.2%.

TECHNICAL PROFICIENCIES

Programming Languages: Python, SQL, HTML, CSS
ML & Deep Learning: Scikit-learn
Data Analysis & Visualisation: Pandas, NumPy, Matplotlib, Seaborn
Databases: MySQL

LICENSES & CERTIFICATIONS

- **The Ultimate Job-Ready Data Science Course** – CodeWithHarry
- **Complete 2026 Python Bootcamp: Learn Python from Scratch** – CodeWithHarry
